Sommario/riassunto	Casey High explores how popular imagery of Amazonian violence has become part of the Waorani's social memory in oral histories, folklore performances, and indigenous political activism. As Amazonian forms of social memory merge with constructions of masculinity and other intercultural processes, the Waorani absorb missionaries, oil development, and logging depredations into their legacy of revenge killings and narratives of victimhood. High shows how these memories of past violence form sites of negotiation and cultural innovation, and thus violence comes to constitute a central part of Amazonian sociality, identity, and memory.

### Sommario/riassunto

When considering the physiological systems of the body, the degree of species variation within the reproductive system compared to other systems is remarkable. Furthermore, it is essential that researchers, educators, and students alike remain aware of the fundamental comparative differences in the reproductive biology of domestic species. Written by renowned scientists in their respective fields, Comparative Reproductive Biology is a comprehensive reference on the reproductive systems of domestic species. The book offers both broad and specific knowledge in areas that have advanced the
