

1. Record Nr.	UNINA9910796956203321
Titolo	Saving the Great Barrier Reef // edited by Justin Healey
Pubbl/distr/stampa	Thirroul, NSW : , : Spinney Press, , [2018] ©2018
ISBN	1925339734 9781925339734
Descrizione fisica	1 online resource (60 pages) : colour illustrations
Collana	Issues in Society ; ; volume 436
Disciplina	333.95
Soggetti	Coral reef ecology - Australia - Great Barrier Reef (Qld.)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Chapter 1: State of the Great Barrier Reef -- Chapter 2: Managing and protecting the reef -- Exploring issues
Sommario/riassunto	As the largest coral reef system on the globe and home to 1,500 species of fish and other diverse marine life, Australia's Great Barrier Reef is unquestionably one of the great wonders of the natural world. Unfortunately, it is also in grave danger of dying. Recent annual back-to-back coral bleaching events have drastically accelerated the existing damage to the Great Barrier Reef and its rich biodiversity. The reef is under threat from numerous pressures, both natural and man-made. These threats include over-fishing, coastal development, agriculture, mining, tourism and the ravaging ecological impacts of climate change. How is Australia sustainably managing the reef and the land-based and sea life it supports? What conservation threats are being effectively addressed – is it too late to save the Great Barrier Reef?
