

1.	Record Nr.	UNINA990000771160403321
	Titolo	Controllo colonizzazione e fascismo sul territorio : Milano, Galleria 291, Maggio / Giugno 1974 / UFO ; con una documentazione a cura di Daniela Palazzoli
	Pubbl/distr/stampa	Firenze : Centro Di, c1974
	Descrizione fisica	[83] p. : ill. ; 23 cm
	Disciplina	335.5
	Locazione	FARBC
	Collocazione	ART.VI M 1
	Lingua di pubblicazione	Italiano
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910796970703321
	Titolo	Improving health research on small populations : proceedings of a workshop / / Nancy Kirkendall and Jordyn White, rapporteurs
	Pubbl/distr/stampa	Washington, DC : , : The National Academies Press, , [2018] ©2018
	ISBN	0-309-47610-0
	Descrizione fisica	1 online resource (151 pages) : illustrations
	Disciplina	362.107201724
	Soggetti	Public health - Research Health surveys - United States - Statistical methods United States
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di contenuto	Introduction and background -- What do we mean by "small populations"? -- Challenges in using available data for small population

health research -- Techniques used in survey research to identify and find small populations for health research -- New and emerging designs for intervention studies -- Recruitment, retention, and collection of data -- Analysis techniques for small population research -- Closing remarks -- Appendixes.

Sommario/riassunto

"The increasing diversity of population of the United States presents many challenges to conducting health research that is representative and informative. Dispersion and accessibility issues can increase logistical costs; populations for which it is difficult to obtain adequate sample size are also likely to be expensive to study. Hence, even if it is technically feasible to study a small population, it may not be easy to obtain the funding to do so. In order to address the issues associated with improving health research of small populations, the National Academies of Sciences, Engineering, and Medicine convened a workshop in January 2018. Participants considered ways of addressing the challenges of conducting epidemiological studies or intervention research with small population groups, including alternative study designs, innovative methodologies for data collection, and innovative statistical techniques for analysis"--Publisher's description.
