	Sommario/riassunto	Most Americans think that our country has done quite a lot to protect women and ensure gender equity in the workplace. After all, we have banned discrimination against women, required equal pay for equal work, and adopted family-leave legislation. But the fact is that we have a two-tiered system, where some working women have a full panoply of rights while others have few or none at all. We allow blatant discrimination by small employers. Domestic workers are cut out of our wage and overtime laws. Part-time workers, disproportionately women, are denied basic benefits. Laws are written through

Sommario/riassunto	This book constitutes the proceedings of the SPEC Benchmark Workshop 2009 held in Austin, Texas, USA on January 25th, 2009. The 9 papers presented were carefully selected and reviewed for inclusion in the book. The result is a collection of high-quality papers discussing current issues in the area of benchmarking research and technology. The topics covered are: benchmark suites, CPU benchmarking, power/thermal benchmarking, and modeling and sampling techniques.
