Sommario/riassunto

Fallgirls provides an analysis of the abuses that took place at Abu Ghraib in terms of social theory, gender and power, based on first-hand participant-observations of the courts-martials of Lynndie England and Sabrina Harman. This book examines the trials themselves, including interactions with soldiers and defense teams, documents pertaining to the courts-martials, US government reports and photographs from Abu Ghraib, in order to challenge the view that the abuses were carried out at the hands of a few rogue soldiers.

Sommario/riassunto

This volume documents and explains the remarkable resilience of emerging market nations in East Asia and Latin America when faced with the global financial crisis in 2008-2009. Their quick bounce back from the crisis marked a radical departure from the past, such as when the 1982 debt shocks produced a decade-long recession in Latin America or when the Asian financial crisis dramatically slowed those economies in the late 1990's. Why? This volume suggests that these countries' resistance to the initial financial contagion is a tribute to financial-sector reforms undertaken over the past two decades
