3.5.4 Socio-cultural motivations for language restructuring

Sommario/riassunto

Second-language varieties of English in the South Pacific have received scant attention, until now. This monograph offers the first book-length analysis of the sociolinguistics and morphosyntax of three representatives of South Pacific L2 English in comparison - two of which have never been described linguistically. The book describes the spread of English, its current status and use in the three island states and compares the most frequent and salient morphosyntactic features to corresponding structures in Asian and African Englishes and the Oceanic substrate languages. As part of a larger th
