Cheating the Millennium: The Mounting Explanatory Debts of Scientific Naturalism Christopher Michael Langan; 14. The Deniable Darwin David Berlinski; Notes;

Sommario/riassunto

Recent years have seen the rise to prominence of ever more sophisticated philosophical and scientific critiques of the ideas marketed under the name of Darwinism. In *Uncommon Dissent*, mathematician and philosopher William A. Dembski brings together essays by leading intellectuals who find one or more aspects of Darwinism unpersuasive. As Dembski explains, Darwinism has gathered around itself an aura of invincibility that is inhospitable to rational discussion—to say the least: "Darwinism, its proponents assure us, has been overwhelmingly vindicated. Any resistance to it is futile and indicates
