Disciplina	541.372
Soggetti	Hydration Materials - Mechanical properties Materials - Technological innovations
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Nota di contenuto	Front Cover; Contents; Preface; Chapter 1 Mechanics of Materials; Chapter 2 Tribology: Friction, Wear and Lubrication; Chapter 3 Articular Cartilage; Chapter 4 The Human Skin and Hydration; Chapter 5 Hydrogel Materials for Tissue Engineering; Chapter 6 Polyethylene Glycol Gel for Orthopaedic Technologies; Chapter 7 Environmentally Friendly Bearing and Sealing Systems with Artificial Articular Cartilage for Power Generation from Natural Energy; Chapter 8 Controlling Water- Based or Oil- Based Film between Shoes and the Floor to Prevent Slips and Falls; Back Cover
Sommario/riassunto	Water covers more than 70% of the earth's surface and is an essential and major component of all living matter. However, artificially hydrated materials, including hydrophilic materials, are far fewer than one might expect. Currently, these materials are in a state of development for applications in fields such as biomedicine, environmental engineering, and industrial engineering. So what do artificially hydrated materials hold for the future? This book is a great introduction to hydrated materials, presenting academic and practical content that gives a feel of theoretical as well as real-worl

Sommario/riassunto

This volume appears as the fourth in a series of reports on the investigations of the Lahav Research Project (LRP) at Tell Halif, located near Kibbutz Lahav in southern Israel. The book and CD, also titled The Figurines of Tell Halif, contain the publication of the terra-cotta and stone figurine assemblage discovered in the Phase III excavations by LRP. The book presents the text of the report, including relevant archaeological contexts, while the CD is the primary source for detailed information about the figurines. It presents color photographs of each artifact, as well as artist's drawings and QuickTime movies, along with descriptions and a working typology of the mixed Iron II, Persian, and Hellenistic period terra-cottas. Together, book and CD offer the entire corpus of 794 figurine and statue fragments and provide an invaluable addition to the corpus of Levantine figurines.
