Leadership Would Make a Difference in the Near Term; Shared NCD Challenges for Collaboration; Conclusion; Additional Views; Endnotes; Task Force Members Task Force ObserversIndependent Task Force Reports
Sommario/riassunto	"Rates of heart disease, cancer, diabetes, and other noncommunicable diseases (NCDs) in low- and middle-income countries are increasing faster, in younger people, and with worse outcomes than in wealthier countries. In 2013 alone, NCDs killed eight million people before their sixtieth birthdays in developing countries. A new CFR-sponsored Independent Task Force report and accompanying interactive look at the factors behind this epidemic and the ways the United States can

best fight it"--Publisher's web site.
