

1. Record Nr.	UNINA9910797371203321
Titolo	Genomics-enabled learning health care systems : gathering and using genomic information to improve patient care and research : workshop summary // Roundtable on Translating Genomic-Based Research for Health, Board on Health Sciences Policy ; Sarah H. Beachy, Steve Olson and Adam C. Berger, rapporteurs ; Institute of Medicine of the National Academies
Pubbl/distr/stampa	Washington, District of Columbia : , : The National Academies Press, , [2015] ©2015
ISBN	0-309-37115-5 0-309-37113-9
Descrizione fisica	1 online resource (116 p.)
Disciplina	572.8
Soggetti	Medicine - Information technology - United States Medical protocols Information storage and retrieval systems - Community health services Medical care - United States - Safety measures United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Front Matter; Reviewers; Acknowledgments; Contents; Boxes, Figures, and Table; Abbreviations and Acronyms; 1 Introduction and Themes of the Workshop; 2 Advancing Patient Care and Research with Genomic Information; 3 Translation of Genomics for Patient Care and Research; 4 Genomics and the EHR in a Learning Health Care System; 5 Representing Genomic Information in the EHR Ecosystem; 6 Possible Next Steps; References; Appendix A: Workshop Agenda; Appendix B: Speaker Biographical Sketches; Appendix C: Statement of Task; Appendix D: Registered Attendees
Sommario/riassunto	"The inclusion of genomic data in a knowledge-generating health care system infrastructure is one promising way to harness the full potential of that information to provide better patient care. In such a system,

clinical practice and research influence each other with the goal of improving the efficiency and effectiveness of disease prevention, diagnosis, and treatment. To examine pragmatic approaches to incorporating genomics in learning health care systems, the Institute of Medicine Roundtable on Translating Genomic-Based Research for Health hosted a workshop which convened a variety of stakeholder groups, including commercial developers, health information technology professionals, clinical providers, academic researchers, patient groups, and government and health system representatives, to present their perspectives and participate in discussions on maximizing the value that can be obtained from genomic information. The workshop examined how a variety of systems are capturing and making use of genomic data to generate knowledge for advancing health care in the 21st century. It also sought to evaluate the challenges, opportunities, and best practices for capturing or using genomic information in knowledge-generating health care systems. Genomics-Enabled Learning Health Care Systems summarizes the presentations and discussion of the workshop."--Publisher's description.
