Conceptualising "language borders", "language contact" and "language conflict" / Watts, Richard J. -- Index

Sommario/riassunto

This volume revisits the issue of language contact and conflict in the Low Countries across space and time. The contributions deal with important sites of Germanic-Romance contact along the different language borders, covering languages such as French, Dutch, German, and Luxembourgish. This first monograph in English on the topic broadens our understanding of current-day issues by integrating a historical perspective, showing how language contact and conflict operated from the Middle Ages and the Early Modern Period, the 18th and 19th centuries, and into the 20th and 21st centuries.

money market, the collateral market and the crisis of 2007-08 --
Chapter 9 Conclusions.

Sommario/riassunto

Looking at the precedents set by the panic of 1907 and the Great Depression in America, this book investigates the causes of the 2007-2008 financial crisis. Pizzutto examines the effects of monetary policy, as well as of expanding and contracting financial cycles, in order to analyze the breakdown of the money market and capital market circuits. Not only exploring the impact of the Federal Reserve and central banking on monetary policy, he also analyzes the role of non-bank financial intermediaries. How can monetary policy resolve the instability of the US financial system? How can financial intermediation work effectively? This timely book highlights how historical lessons can be used to avoid the next financial crisis. .
