Sommario/riassunto

Link relevant data to results instantly and consistently! This powerful text offers school leaders a process for data-based decision making that includes the critical elements of school improvement: collaborative teams, meaningful data, and measurable results. Administrators and instructors select the data, dialogue about the findings, and then make informed decisions about improving student performance. Educators will learn to: Select data that is easily accessible, collectible on an ongoing basis, and capable of impacting student achievement Use the three-step cyclical model of data analysis
