Sommario/riassunto

The Changing Arctic and the European Union provides a balanced and up-to-date overview of the multidimensional change taking place in the Arctic regions. Against this background, the role of the European Union regarding Arctic developments is considered, including the ongoing process of formulating an umbrella EU Arctic policy. In particular, the themes of climate change, maritime transport, fisheries, offshore oil and gas extraction, mining, land use and sociocultural change are discussed. The book comprises primarily an updated and expanded version of the report Strategic Assessment of Development of the Arctic: An assessment conducted for the European Union , produced for the European Commission. The report was to a great extent based on the interaction with Arctic stakeholders.

Sommario/riassunto	This book constitutes the proceedings of the 24th International Symposium on Foundations of Intelligent Systems, ISMIS 2018, held in Limassol, Cyprus, in October 2018. The 32 full, 8 short, and 4 application papers presented in this volume were carefully reviewed

and selected from 59 submissions. The papers deal with topics such as bioinformatics and health informatics, graph mining, image analysis, intelligent systems, mining complex patterns, novelty detection and class imbalance, social data analysis, spatio-temporal analysis, and topic modeling and opinion mining. In addition, three special sessions were organized, namely: Special Session on Granular and Soft Clustering for Data Science, Special Session on Intelligent Methodologies for Traffic Data Analysis and Mining, and Special Session on Advanced Methods in Machine Learning for Modeling Complex Data.
