Sommario/riassunto	What accounts for the seemingly atypical pattern of scriptural exegesis that Paul uses to interpret Exodus 34 in 2 Cor 3:7-18? While previous scholars have approached this question from a variety of angles, in this monograph, Michael Cover grapples particularly with the evidence of contemporaneous Jewish and Greco-Roman commentary traditions. Through comparison with Philo of Alexandria's Allegorical Commentary, the Pseudo-Philonic homilies De Jona and De Sampsone, the Anonymous Theaetetus Commentary, the Dead Sea Scrolls, Seneca's Epistulae Morales, and other New Testament texts, Paul's interpretation of Exodus emerges as part of a wider commentary practice that Cover terms "secondary-level exegesis." This study also provides new analysis of the way ancient authors, including Paul, interwove commentary

forms and epistolary rhetoric and offers a reconstruction of the context of Paul's conflict with rival apostles in Corinth. At root was the legacy of Moses and of the Pentateuch itself, how the scriptures ought to be read, and how Platonizing theological and anthropological traditions might be interwoven with Paul's messianic gospel.

Sommario/riassunto

This book presents the proceedings of the 8th International Conference on Engineering, Project, and Product Management (EPPM 2017), highlighting the importance of engineering, project and product management in a region of the world that is in need of transformation and rebuilding. The aim of the conference was to bring together the greatest minds in engineering and management and offer them a platform to share their innovative, and potentially transformational, findings. The proceedings are comprehensive, multidisciplinary, and advanced in their approach with an appeal not only for academicians and university students but also for professionals in various engineering fields, especially construction, manufacturing and production.
