

1. Record Nr.	UNINA9910797686803321
Autore	Vajravelu Kuppalapalle
Titolo	Fluid flow, heat and mass transfer at bodies of different shapes : numerical solutions // Kuppalapalle Vajravelu, Swati Mukhopadhyay
Pubbl/distr/stampa	Amsterdam, [Netherlands] : , : Academic Press, , 2016 ©2016
ISBN	0-12-803785-7
Descrizione fisica	1 online resource (0 p.)
Disciplina	620.106
Soggetti	Fluid mechanics - Mathematical models
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Sommario/riassunto	Most of the equations governing the problems related to science and engineering are nonlinear in nature. As a result, they are inherently difficult to solve. Analytical solutions are available only for some special cases. For other cases, one has no easy means but to solve the problem must depend on numerical solutions. Fluid Flow, Heat and Mass Transfer at Bodies of Different Shapes: Numerical Solutions presents the current theoretical developments of boundary layer theory, a branch of transport phenomena. Also, the book addresses the theoretical developments in the area and presents a number of physical problems that have been solved by analytical or numerical method. It is focused particularly on fluid flow problems governed by nonlinear differential equations. The book is intended for researchers in applied mathematics, physics, mechanics and engineering
