

1. Record Nr.	UNINA9910797745103321
Autore	McGilchrist Iain
Titolo	The master and his emissary : the divided brain and the making of the Western world / / Iain McGilchrist
Pubbl/distr/stampa	New Haven : , : Yale University Press, , [2010] ©2010
ISBN	0-300-19758-6
Descrizione fisica	1 online resource
Disciplina	612.8/2
Soggetti	Cerebral dominance
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Asymmetry and the brain -- What do the two hemispheres 'do'? -- Language, truth, and music -- The nature of the two worlds -- The primacy of the right hemisphere -- The triumph of the left hemisphere -- Imitation and the evolution of culture -- The ancient world -- The Renaissance and the Reformation -- The Enlightenment -- Romanticism and the Industrial Revolution -- The modern and post-modern worlds.
Sommario/riassunto	In a book of unprecedented scope--now available in a larger format—Iain McGilchrist presents a fascinating exploration of the differences between the brain's left and right hemispheres, and how those differences have affected society, history, and culture. McGilchrist draws on a vast body of recent research in neuroscience and psychology to reveal that the difference is profound: the left hemisphere is detail oriented, while the right has greater breadth, flexibility, and generosity. McGilchrist then takes the reader on a journey through the history of Western culture, illustrating the tension between these two worlds as revealed in the thought and belief of thinkers and artists from Aeschylus to Magritte. "A landmark new book. . . . It tells a story you need to hear, of where we live now."
