Sommario/riassunto	Published by the American Geophysical Union as part of the Geophysical Monograph Series, Volume 197. Many of the most basic aspects of the aurora remain unexplained. While in the past terrestrial and planetary auroras have been largely treated in separate books, Auroral Phenomenology and Magnetospheric Processes: Earth and Other Planets takes a holistic approach, treating the aurora as a fundamental process and discussing the phenomenology, physics, and relationship with the respective planetary magnetospheres in one volume. While there are some behaviors common in auroras of

Sommario/riassunto

Assessing the Impact of Foreign Aid: Value for Money and Aid for Trade provides updated information on how to improve foreign aid programs, exploring the concept and practice of impact assessment within the sometimes-unproblematic approaches advocated in current literature of value for money and aid for trade. Contributors from multi-lateral agencies and NGOs discuss the changing patterns of Official Development Assistance and their effects on impact assessment, providing theoretical, political, structural, methodological, and practical frameworks, discussions, and a theory-practice nexus. With twin foci of economics and policy this book raises the potential for making sophisticated and coherent decisions on aid allocation to developing countries. Addresses the impact of aid for trade and value for money, rather than its implementation Discusses the changing patterns of Official Development Assistance and their effects on impact assessment, providing theoretical, political, structural, methodological, and practical frameworks, discussions, and a theory-practice nexus Assesses the effects and implications of the value for money and aid for trade agendas Highlights economic issues
