Sommario/riassunto	"Covering 5,000 years of global history, How Food Made History traces the changing patterns of food production and consumption that have molded economic and social life and contributed fundamentally to the development of government and complex societies. Charts the changing technologies that have increased crop yields, enabled the industrial processing and preservation of food, and made

transportation possible over great distances Considers social attitudes towards food, religious prohibitions, health and nutrition, and the politics of distribution Offers a fresh understanding of world history through the discussion of food"--

Sommario/riassunto	This book is about the implications of novels for young readers that tell their stories by alternating between different narrative lines focused on

different characters. It asks: if you make sense of fiction by identifying with one main character, how do you handle two or more of them? Do novels with alternating narratives diverge from longstanding conventions and represent a significant change in literature for young readers? If not, how do these novels manage to operate within the parameters of those conventions? This book considers answers to these questions by means of a series of close readings that explore the structural, educational and ideological implications of a variety of American, British, Canadian and Australian novels for children and for young adults. .
