Soggetti	Grief Counseling Death - Attitudes
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	The book addresses grieving patterns and intervention strategies according to the life trajectory and provides clinical intervention tools and strategies for coping according to the developmental stage of an individual. It incorporates losses beyond death loss, with special focus on losses related to maturational development. The second edition reflects new research that has clarified and underscored the value of theories examined in the first edition, particularly in the areas of continued bonds, disenfranchised grief, and ambiguous grief. It describes how grieving is influenced by biological responses to stress, psychological responses to loss, and social norms and support networks.--publisher.
