Zigerell -- Developments in search and seizure cases in the Post September 11 era / Thomas E. McClure.

Sommario/riassunto

Examining its subject through the lens of Fourth Amendment rights, this text focuses on technological advances that now gather personal data on an unprecedented scale, whether by monitoring social media, tracking cell phones, or using thermal imaging to watch people's movement. It also examines the possible impact of the widespread gathering of such data by law enforcement and security agencies and by private corporations such as Google.
