   Nota di contenuto Preface -- Introduction : framing the global democratic dynamic --
                     Western liberal democracy as cognitive imperialism : a theoretical
                     exploration -- Globalization and democratization as rewesternization
                     -- Toward liberation from western democracy's cognitive imperialism.

   Sommario/riassunto There seems to be a sort of prevalent attitude in the Western world that
                     its brand of democracy is something of a catch all solution for all the
                     world's political problems. Hence, Western imperialism has always been
                     sold under the pretext of spreading freedom and democracy.
                     Democracy is beautiful. But it is no proof against imperialism. Whether
                     democracy is causal is another whole consideration. It may be a case of
                     the 'least bad of evil alternatives.' It may be a case of a state of social
                     and political development over and above the way people organize
                     themselves. It may be the fate of rational life on a planet with
                     insufficient energy reserves to support locomotion without predation.
                     But what gives anyone the right to go into a sovereign country and
                     change its foundation through War? The whole democracy & freedom
                     line is a lie to give Western imperialism a friendly face. Imperialism and
                     its lie of spreading democracy is an unmitigated evil, whether for
                     material gain, or the pride fostered by active participation in the
                     machinery of state. Therefore, a people seeking to control their destiny

must decolonize imposed Western democracy.
