Encourage Active Student Participation in Decision Making

Sommario/riassunto

Bullying is not new, but its venues have expanded to include social media and mobile phones. When students receive hurtful, threatening, or sexually explicit electronic messages, it affects their ability to concentrate on schoolwork. Renowned cyberbullying experts Sameer Hinduja and Justin W. Patchin connect the off-campus, high-tech behaviours of teens to the school environment and provide educators with a road map for developing a positive school climate that counteracts cyberbullying and sexting.
