

1. Record Nr.	UNINA9910797838503321
Autore	Singh Sarjinder
Titolo	A new concept for tuning design weights in survey sampling : jackknifing in theory and practice / / by Sarjinder Singh, Texas A&M University-Kingsville, TX, USA ; Stephen A. Sedory, Texas A&M University-Kingsville, TX, USA, Maria del Mar Rueda, University of Granada, Spain, Antonio Arcos, University of Granada, Spain, Raghunath Arnab, University of Botswana and University of KwaZulu-Natal, S. Africa
Pubbl/distr/stampa	London : , : Elsevier, , [2016] ©2016
ISBN	0-08-100595-4
Descrizione fisica	1 online resource (318 p.)
Soggetti	Sampling (Statistics)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Front Cover; A New Concept for Tuning Design Weights in Survey Sampling: Jackknifing in Theory and Practice; Copyright; Dedication; Contents; Preface; Further studies; Acknowledgments; Chapter 1: Problem of estimation; 1.1. Introduction; 1.2. Estimation problem and notation; 1.3. Modeling of jumbo pumpkins; 1.3.1. R code; 1.4. The concept of jackknifing; 1.5. Jackknifing the sample mean; 1.6. Doubly jackknifed sample mean; 1.7. Jackknifing a sample proportion; 1.8. Jackknifing of a double suffix variable sum; 1.9. Frequently asked questions; 1.10. Exercises Chapter 2: Tuning of jackknife estimator2.1. Introduction; 2.2. Notation; 2.3. Tuning with a chi-square type distance function; 2.3.1. Problem of undercoverage; 2.3.2. Estimation of variance and coverage; 2.3.3. R code; 2.3.4. Remark on tuning with a chi-square distance; 2.3.5. Numerical illustration; 2.3.6. R code used for illustration; 2.3.7. Problem of negative weights; 2.4. Tuning with dell function; 2.4.1. Estimation of variance and coverage; 2.4.2. R code; 2.4.3. Numerical illustration; 2.4.4. R code used for illustration; 2.5. An important remark; 2.6. Exercises

Chapter 3: Model assisted tuning of estimators
3.1. Introduction; 3.2.
Model assisted tuning with a chi-square distance function; 3.2.1.
Estimation of variance and coverage; 3.2.2. R code; 3.3. Model assisted
tuning with a dual-to-empirical log-likelihood (dell) function; 3.3.1.
Estimation of variance and coverage; 3.3.2. R code; 3.4. Exercises;
Chapter 4: Tuned estimators of finite population variance; 4.1.
Introduction; 4.2. Tuned estimator of finite population variance; 4.3.
Tuning with a chi-square distance; 4.3.1. Estimation of variance of the
estimator of variance and coverage
4.3.2. R code
4.3.3. Remark on tuning with a chi-square distance; 4.3.4.
Numerical illustration; 4.3.5. R code used for illustration; 4.3.6. F-
distribution; 4.4. Tuning of estimator of finite population variance with
a dual-to-empirical log-likelihood (dell) function; 4.4.1. Estimation of
variance and coverage; 4.4.2. R code; 4.4.3. Numerical illustration;
4.4.4. R code used for illustration; 4.5. Alternative tuning with a chi-
square distance; 4.5.1. Estimation of variance and coverage; 4.5.2. R
code; 4.5.3. Numerical illustration; 4.5.4. R code used for illustration
4.6. Alternative tuning with a dell function
4.6.1. Estimation of variance
and coverage; 4.6.2. R code; 4.6.3. Numerical illustration; 4.6.4. R code
used for illustration; 4.7. Exercises; Chapter 5: Tuned estimators of
correlation coefficient; 5.1. Introduction; 5.2. Correlation coefficient;
5.3. Tuned estimator of correlation coefficient; 5.3.1. Estimation of
variance of the estimator of correlation coefficient and coverage; 5.3.2.
R code; 5.3.3. Numerical illustration; 5.3.4. R code used for illustration;
5.4. Exercises; Chapter 6: Tuning of multicharacter survey estimators
6.1. Introduction
