Record Nr. UNINA9910797903503321 Autore Coyne Richard Titolo Mood and mobility: navigating the emotional spaces of digital social networks / / Richard Coyne Pubbl/distr/stampa Cambridge, Massachusetts;; London, England:,: The MIT Press,, [2016] [Piscatagay, New Jersey]:,: IEEE Xplore,, [2016] ©2016 **ISBN** 0-262-33090-3 0-262-33089-X Descrizione fisica 1 online resource (389 p.) Disciplina 004.01/9 Soggetti Digital media Human-computer interaction - Psychological aspects Mood (Psychology) Online social networks - Psychological aspects Web sites - Design Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Description based upon print version of record. Note generali Nota di bibliografia Includes bibliographical references (pages 327-358) and index. Nota di contenuto Contents; Preface; Introduction; What Is a Mood?; Moved by the Mob; Captivated by Curiosity; Piqued by Pleasure; Addicted to Vertigo; Enveloped in Haze: Intoxicated by Color: Haunted by Media: Gripped by Suspense; Fogged by Ignorance; Aroused by Machines; Epilogue; Notes; Bibliography; Index Sommario/riassunto We are active with our mobile devices; we play games, watch films, listen to music, check social media, and tap screens and keyboards while we are on the move. In Mood and Mobility, Richard Coyne argues that not only do we communicate, process information, and entertain ourselves through devices and social media; we also receive, modify, intensify, and transmit moods. Designers, practitioners, educators, researchers, and users should pay more attention to the moods created around our smartphones, tablets, and laptops. Drawing on research

from a range of disciplines, including experimental psychology, phenomenology, cultural theory, and architecture, Coyne shows that

users of social media are not simply passive receivers of moods; they are complicit in making moods. Devoting each chapter to a particular mood -- from curiosity and pleasure to anxiety and melancholy -- Coyne shows that devices and technologies do affect people's moods, although not always directly. He shows that mood effects are transitional; different moods suit different occasions, and derive character from emotional shifts. Furthermore, moods are active; we enlist all the resources of human sociability to create moods. And finally, the discourse about mood is deeply reflexive; in a kind of metamoodiness, we talk about our moods and have feelings about them. Mood, in Coyne's distinctive telling, provides a new way to look at the ever-changing world of ubiquitous digital technologies.
