Sommario/riassunto

Der Sammelband zielt darauf ab, das heuristische Potential von Metatexten darzustellen, die aus vergangenen Kulturen stammen. Wissenschaftlerinnen und Wissenschaftler aus der alttestamentlichen Wissenschaft, der Judaistik und der literaturwissenschaftlichen Mediävistik stellen exemplarische Analysen verschiedener Metatexte - schriftlicher Texte, die Schriftstücke thematisieren - vor. Sie fokussieren auf Erzählungen von schriftragenden Artefakten. Damit nehmen sie die Schriftstücke, die in Metatexten vorgestellt werden, nicht nur als schriftliche Texte, sondern auch als materielle Artefakte in den Blick. Viele Metatexte beschreiben die materielle Dimension des Geschriebenen. Sie erzählen von der Größe von Handschriften oder Steintafeln und ihrer spezifischen Mobilität oder Immobilität. Sie berichten von ihrer konkreten Gestalt und deren Manipulation. Hierin liegt ein noch nicht ausgeschöpftes heuristisches Potential. Bei der Analyse schriftragender Artefakte stehen nicht die hermeneutischen Akte der Bedeutungszuweisung im Vordergrund, sondern etwas, das "vor" der Hermeneutik liegt: es geht um eine Dimension, die hermeneutischen Akten der Bedeutungszuschreibung vorausgeht, ihnen zugrunde liegt und sie blockieren kann.

Sommario/riassunto	Ce livre constitue la première étude du rôle de la génération dans les systèmes philosophiques d'Aristote et d'Averroès (1126-1198). En s'

appuyant sur de nombreux textes traduits du grec, de l'arabe et du latin, l'auteur propose une nouvelle lecture de la théorie aristotélicienne de la génération, ainsi qu'une interprétation de son renouvellement par le Commentateur. Les traités majeurs consacrés par Averroès à la physique générale, à la théorie des éléments et à la biologie d'Aristote sont, pour la première fois, examinés dans leur rapport mutuel et dans celui qu'ils entretiennent à la métaphysique. Cette étude transversale révèle les nouveaux enjeux philosophiques et épistémologiques au fondement du système d'Averroès : dans la lignée de l'aristotélisme essentialiste d'Alexandre d'Aphrodise et tout en réfutant la doctrine créationniste de certains théologiens de l'Islam, le philosophe cordouan établit le fondement *a posteriori* de tout savoir humain. La philosophie d'Averroès est ainsi réinterprétée comme un jalon fondamental d'une histoire qui, du monde grec à la modernité, scelle le destin commun de la philosophie naturelle et de la métaphysique.
