Autore	Bayly M. Brian <1929->
Titolo	Chemical change in deforming materials [[electronic resource] /] / Brian Bayly
Pubbl/distr/stampa	New York, : Oxford University Press, 1992
ISBN	0-19-756021-0 1-280-52551-7 9786610525515 0-19-536188-1 1-4237-9997-6
Descrizione fisica	1 online resource (245 p.)
Collana	Oxford monographs on geology and geophysics ; ; no. 21
Disciplina	620.1/1242
Soggetti	Chemical equilibrium Deformations (Mechanics) Geochemistry Materials - Compression testing Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Previously issued in print: 1992.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; Symbols; 1. Overview and preview of conclusions; I: FUNDAMENTALS; II: SIMULTANEOUS DEFORMATION AND DIFFUSION; III: APPLICATION: MOVEMENTS ALONG ONE DIRECTION; IV: EXTENSIONS; References and notes; Index
Sommario/riassunto	This work details the chemical changes that occur in deforming materials subjected to unequal compressions. While thermodynamics provides, at the macroscopic level, an excellent means of understanding & predicting the behaviour of materials in equilibrium & non-equilibrium states, much less is understood about nonhydrostatic stress & interdiffusion at the chemical level. Little is known, for example, about the chemistry of a state resulting from a cylinder of deforming material being more strongly compressed along its length than radially, a state of non-equilibrium that remains no matter how ideal the cylinder's condition in other respects. M. Brian Bayly here

provides the outline of a comprehensive approach to gaining a simplified & unified understanding of such phenomena.

Sommario/riassunto	"The Doctrine of Essence" is among the most difficult texts in Hegelian philosophy. Typically, attention focused exclusively on the first section, which contains Hegel's theory of contradiction. Instead, this volume includes essays on all sections, including their connection to the preceding logic of being and to the doctrine derived from this concept. It additionally examines Marx's reception of the work, thereby fully disclosing Hegel's work. „Die Lehre vom Wesen“, das 1813 erschienene zweite Buch des ersten Bandes („Die objektive Logik“) der „Wissenschaft der Logik“, gehört zu den schwierigsten und auch umstrittensten Texten nicht nur der Hegelschen Philosophie. Diskutiert wird zumeist nur der erste

Abschnitt („Das Wesen als Reflexion in ihm selbst“), der Hegels Theorie des Widerspruchs enthält. Der vorliegende Band, der aus einer Tagung im Frankfurter „Haus am Dom“ im Dezember 2013 hervorgegangen ist, umfasst dagegen Beiträge zu allen Abschnitten der Hegelschen Wesenslogik, ihrem Verhältnis zur vorausgehenden Seinslogik sowie zur nachfolgenden Lehre vom Begriff; beleuchtet wird auch ihre Rezeption durch Karl Marx. Das Buch bietet daher einen Kommentar, der Hegels „Lehre vom Wesen“ vollständig erschließt.
