

1. Record Nr.	UNINA9910798195703321
Autore	Merchan Miguel A.
Titolo	Cajal and De Castro's neurohistological methods // Miguel A. Merchan, Javier deFelipe, Fernando de Castro
Pubbl/distr/stampa	New York, New York : , : Oxford University Press, , 2016 ©2016
ISBN	0-19-022160-7 0-19-022162-3 0-19-022161-5
Edizione	[First edition.]
Descrizione fisica	1 online resource (306 pages)
Disciplina	611.0092
Soggetti	Nervous system
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; Cajal and de Castro's Neurohistological Methods; Copyright; Dedication; Contents; Preface; Foreword; Preliminary Information; List of Plates; Plates; Section One Historical Context; 1 The Authors and Their Backgrounds ; Section Two Basic Histological Techniques; 2 The Microscope and the Fixatives; Microscope; Fixatives; 3 Decalcifying Agents; 4 General Dissociation Procedures; Embedding Techniques and Agents (Celloidin, Paraffin and Gelatin); Dissociation; Sectioning; Frozen Section Procedure; Celloidin and Collodion Embedding; Paraffin Embedding; Gelatin Embedding Silver Impregnation Methods Impregnation of the Golgi Apparatus; Demonstration of Plastosomes, Centrosomes, Oxidases, and Pigmentary Spherules; Nucleus and Cell Membrane; 12 Staining of Neuronal Axons in the Centers; 13 Myelin Staining; 14 Coloration of the Macrogliia, Microglia, and Oligodendroglia; Macrogliia; Demonstration of the Gliosomes and Mitochondria; Impregnation of Oligodendroglia and Microglia; 15 Methods to Demonstrate the Connective Tissue; Methods for Staining the Connective Tissue; Impregnation Methods for Connective Tissue; Supravital Staining with Acidic Dyes Lantermann Incisures

Sommario/riassunto

Cajal and De Castro's Neurohistological Methods provides the first English translation of Fernando de Castro's 1933 publication Elementos de Técnica Micrográfica del Sistema Nervioso. A student of the famed founder of modern neuroscience, with Santiago Ramon y Cajal also serving as the editor of the original text, Fernando de Castro recorded all the various protocols that had been used in his laboratory by his students in order to provide a manual of histological procedures specifically designed for the fine structure of the nervous system.
