Sommario/riassunto	Creating and Promoting Lifelong Learning in Public Libraries describes

specific ways that public librarians and other professionals can promote lifelong learning by planning and implementing Information Literacy Instruction (ILI). This book includes chapters on planning for instruction, using teaching methods, teaching with and about technology, and combining elements of ILI with more traditional public library programs, services, and activities. It is the sequel to *Lifelong Learning in Public Libraries: Principles, Programs, and People*.
