Sommario/riassunto

This book builds on a year-long discussion with a group of academics, policy-makers and industry experts to provide a long-term contribution to the Capital Markets Union project, launched by the European Commission in 2015. It identifies 36 cross-border barriers to capital markets integration and provides an organic plan, consisting of 33 policy recommendations, to relaunch EU financial integration. These aim to improve the key components of cross-border capital market transactions.
