

1. Record Nr.	UNINA9910798600203321
Autore	Bakker Frederik A.
Titolo	Epicurean meteorology : sources, method, scope and organization / / by Frederik A. Bakker
Pubbl/distr/stampa	Leiden, Netherlands ; ; Boston, [Massachusetts] : , : Brill, , 2016 ©2016
ISBN	90-04-32158-6
Descrizione fisica	1 online resource (313 p.)
Collana	Philosophia Antiqua, , 0079-1687 ; ; Volume 142
Disciplina	551.501
Soggetti	Epicureans (Greek philosophy) Meteorology - History Philosophy, Ancient
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front Matter / Frederik A. Bakker -- General Introduction / Frederik A. Bakker -- Multiple Explanations / Frederik A. Bakker -- Range and Order of Subjects in Ancient Meteorology / Frederik A. Bakker -- The Shape of the Earth / Frederik A. Bakker -- General Conclusions / Frederik A. Bakker -- Multiple Explanations in Epicurus' Letter to Pythocles / Frederik A. Bakker -- Multiple Explanations in Lucretius' DRN V and VI / Frederik A. Bakker -- General Structure of the Syriac Meteorology / Frederik A. Bakker -- Bibliography / Frederik A. Bakker -- Indexes / Frederik A. Bakker.
Sommario/riassunto	In Epicurean Meteorology Frederik Bakker discusses the meteorology as laid out by Epicurus (341-270 BCE) and Lucretius (1st century BCE). Although in scope and organization their ideas are clearly rooted in the Peripatetic tradition, their meteorology sets itself apart from this tradition by its systematic use of multiple explanations and its sole reliance on sensory evidence as opposed to mathematics and other axiomatic principles. Through a thorough investigation of the available evidence Bakker offers an updated and qualified account of Epicurean meteorology, arguing against Theophrastus' authorship of the Syriac meteorology , highlighting the originality of Lucretius' treatment of mirabilia , and refuting the oft-repeated claim that the Epicureans held

the earth to be flat.
