Sommario/riassunto

Fitful Histories and Unruly Publics re-examines the relationship between Eurasia's past and its present by interrogating the social construction of time and the archaeological production of culture. Traditionally, archaeological research in Eurasia has focused on assembling normative descriptions of monolithic cultures that endure for millennia, largely immune to the forces of historical change. The papers in this volume seek to document forces of difference and contestation in the past that were produced in the perceptible engagements of peoples, things, and places. The research gathered here convincingly demonstrates that these forces made social life in ancient Eurasia rather more fitful and its publics considerably more unruly than archaeological research has traditionally allowed. Contributors are Mikheil Abramishvili, Paula N. Doumani Dupuy, Magnus Fiskesjö, Hilary Gopnik, Emma Hite, Jean-Luc Houle, Erik G. Johannesson, James A. Johnson, Lori Khatchadourian, Ian Lindsay, Maureen E. Marshall, Mitchell S. Rothman, Irina Shingiray, Adam T. Smith, Kathryn O. Weber and Xin Wu.

Sommario/riassunto

The Rhetorical Nature of XML is the first volume to combine rhetoric, XML, and knowledge management in a substantive manner. It serves as a primer on XML and XML-related technologies, illustrating how the naming of XML elements can be understood as a rhetorical act, and detailing the essentials of knowledge management practices that illustrate the need for intelligently conceived databases in organizations. Authors J.D. Appen and Rudy McDaniel explain how technical knowledge and rhetorical knowledge are symbiotic assets in the modern information economy, emphasizing that skilled
