Sommario/riassunto	Where are the next decade's greatest investment opportunities? Veteran investor Marko Dimitrijevic argues that they can be found in frontier markets, which account for seventy-one of the world's seventy-five fastest-growing economies and 19 percent of the world's GDP. Yet many investors ignore them. Fueled by new access to technology and information, frontier markets are emerging even faster than their

predecessors, making them an essential component of a globally diversified portfolio. In *Frontier Investor*, Dimitrijevic shows through colorful case studies, compelling charts, and fascinating travel anecdotes that it is not only possible but prudent to invest in these unfamiliar and undervalued options. Dimitrijevic explains how frontier markets such as Nigeria, Panama, and Bangladesh are poised to follow the similar paths of Chinese, Indian, and Russian markets, which were considered exotic two decades ago. He details a strategy for how and where to invest, directly or indirectly, to profit from frontier growth. Dimitrijevic covers the risks, political and otherwise, of these markets, the megatrends that promise exciting investment opportunities in the coming years, and the prospects for countries beyond the frontier, including Myanmar, Cuba, and even Iran. Rich with experience and insight, *Frontier Investor* opens up a whole new world-and worldview-to investors.
