Organizational corruption in the education system / Alessandro Hinna, Fabio Monteduro, and Sonia Moi -- 8. Human resource management in UK higher education: business schools and their dark side / Thomas F. Burgess -- About the authors -- Index.
Sommario/riassunto	There are three main reasons for this book. First, since there is a highly

active dark side to the organizations, which is quite unknown in management studies, this book attempts to shed the light on the practical challenges for business practice and for higher education management that come from misconduct occurring in various aspects of business and educational environment. Second, research on the "dark side" is a new, emerging source of research in the area of business and higher education management. Finally, it is virtually impossible to carry all the works and research on the development of positive, bright sides of business and higher education without a thorough knowledge and understanding of the destructive, dark sides of organizations that have led and still lead to the collapse of many organizations and a decline in public confidence in the corporations and their leaders.
