Sommario/riassunto	Featuring interviews with topflight scholars discussing their work and that of their colleagues, this retrospective of the first hundred years of Columbia Business School recounts the role of the preeminent institution in transforming education, industry, and global society. From its early years as the birthplace of value investing to its seminal influence on Warren Buffett and Benjamin Graham, the school has been a profound incubator of ideas and talent, determining the direction of

American business. In ten chapters, each representing a single subject of the school's research, senior faculty members recount the collaborative efforts and innovative approaches that led to revolutionary business methods in fields like finance, economics, and accounting. They describe the pioneering work that helped create new quantitative and stochastic tools to enhance corporate decision making, and they revisit the groundbreaking twentieth-century marketing and management paradigms that continue to affect the fundamentals of global business. The volume profiles several prominent centers and programs that have helped the school adapt to recent advancements in international business, entrepreneurship, and social enterprise. Columbia Business School has long offered its diverse students access to the best leaders and thinkers in the industry. This book not only reflects on these relationships but also imagines what might be accomplished in the next hundred years.

 Ethical Consideration in Qualitative Interviewing

Sommario/riassunto

The book is divided into four parts: (1) foundations of qualitative research methods consisting of a chapter summarizing the various qualitative paradigms and a research methods chapter illuminating various design features such as data collection and analysis, qualitative standards and ethics; (2) frequently used qualitative methods in the study of leadership designs; (3) underutilized qualitative methods; (4) three commissioned empirical studies illustrating content analysis, narrative analysis, and mixed methods study using content analysis and case study. The book also includes a chapter on the use non-textual, image-based sources of data for qualitative leadership research. Each of the methods chapters contains a number of leadership studies that have employed a given method such as case study, interviewing or phenomenology. The book is intended for students of leadership ranging from graduate students to seasoned leadership scholars. It was written with leadership practitioners in mind who wish to broaden their understanding of new developments in leadership research.
