

1. Record Nr.	UNINA9910799211703321
Autore	Majumder Abir B
Titolo	Understanding Kinetic Resolution by Hydrolases : Maximizing Enantioselectivity / / by Abir B. Majumder, Kalluri V. S. Ranganath
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2023
ISBN	9783031463532 3031463536
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (57 pages)
Collana	SpringerBriefs in Molecular Science, , 2191-5415
Altri autori (Persone)	RanganathKalluri V. S
Disciplina	572.793
Soggetti	Bioorganic chemistry Catalysis Chemistry, Organic Catalysts Bioorganic Chemistry Organic Chemistry Catalyst Synthesis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Understanding Enzymatic Kinetic Resolution -- Essential Parameters: Determination and Significance - Enantioselectivity: The Decisive Factors -- Dynamic Kinetic Resolution.
Sommario/riassunto	This brief is a concise guide that explores the theory and practical aspects of improving enantioselectivity in enzymatic kinetic resolution, with a specific focus on the role of hydrolases in this process. Enzymatic kinetic resolution is a valuable technique for obtaining enantiopure compounds, and hydrolases are highlighted as a crucial class of enzymes widely used in industries for chiral synthesis involving kinetic resolution. The book emphasizes the importance of tuning and optimizing the enzymatic kinetic resolution process to achieve the highest possible enantiomeric excess in the final product or starting material while maintaining the desired yield. Through illustrative examples, the text aims to make the concept accessible and appealing to graduate students, researchers, and young organic chemists seeking to incorporate hydrolases in their stereoselective synthesis endeavors.
