Sommario/riassunto	This book is a collection of contributions related to India–China relationship beyond the issue of borders. It focuses on those elements that play important role in defining, continuing, and strengthening the interaction between the two countries. In doing so, it explores roles of language and linguistics, history and culture, politics and economy, and philosophy and sociology that mediated ancient and modern interfaces.

The book observes the role of silk route in the economic, political, and scholarly exchanges between ancient civilizations and in the movement of Buddhism to China and other Asian nations. The contributors highlight how the two countries have co-existed in various eras and tackled issues of conflict and cooperation during lows and highs in the past and present. It pays special attention to the role of language and linguistic competence as an important component of socio-cultural comprehension of a society and introduces major innovations and challenges in teaching and learning the Chinese language. The wide-ranging contributions make the book an attractive resource for academics, think-tanks, diplomats, and researchers working on Asian/India–China studies across the globe.
