

1. Record Nr.	UNINA9910799279003321
Autore	Alcántara-Ayala Irasema
Titolo	Progress in Landslide Research and Technology . Volume 2 . Issue 2 2023
Pubbl/distr/stampa	Cham : , : Springer International Publishing AG , , 2024 ©2023
ISBN	9783031442964 3031442962
Edizione	[First edition.]
Descrizione fisica	1 online resource (490 pages)
Collana	Progress in Landslide Research and Technology Series.
Soggetti	Landslides Geotechnical engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Editorial Board of the Book Series -- Editor-in-Chief -- Assistant Editors-in-Chief -- Editors -- KLC2020 Managing Committee -- Advisory Members for KLC2020 -- KLC2020 Official Promoters -- Public Sectors: KLC2020 Official Promoters-Public -- International Unions/Associations, Governmental Organizations, Universities and Research Institutes -- Private Sectors: KLC2020 Official Promoters- Private -- Companies and Corporation -- Standing Editors for KLC2020 Book Series -- Editorial Office -- Global Promotion Committee of the International Programme on Landslides and Kyoto Landslide Commitment 2020 -- A Commitment to the Sendai Framework and the Sustainable Development Goals -- Members of the IPL-KLC Global Promotion Committee -- Contents -- Part I: ICL Landslide Lesson -- Advancements in Shear Strength Interpretation, Testing, and Use for Landslide Analysis -- 1 Background -- 2 Causes of Landslides -- 3 Planning and Design of Landslide Stabilization Works -- 4 Brief Overview of Shear Strengths -- 5 Shear Strength Measurements -- 5.1 Direct Shear Tests -- 5.2 Triaxial Tests -- 5.3 Direct Simple Shear Tests -- 5.4 Ring Shear Tests -- 5.5 Cyclic Simple Shear Tests -- 5.6 Cyclic Triaxial Tests -- 6 Correlations Methods to Obtain Soil Shear Strengths -- 6.1 Fully Softened Shear Strength -- 6.2 Residual Shear Strength -- 6.3 Undrained Shear Strengths of Over-Consolidated Clays

-- 6.4 Cyclic Shear Strength -- 6.5 Post-Cyclic Undrained Shear Strength -- 6.6 Various Other Correlations -- 7 Example of Shear Strength Estimation with Correlation Methods -- 8 Summary and Recommendations -- References -- Rock Avalanches in the Tibetan Plateau of China -- 1 Introduction -- 2 Geological Setting of the Studied Area -- 3 Distribution of Rock Avalanches in the Study Area -- 3.1 Spatial Distribution of Rock Avalanches in the Himalayan Range, China. 3.2 Locations of the Typical Rock Avalanches -- 4 Characteristics of Typical Rock Avalanche Deposits -- 4.1 Luanshibao Rock Avalanche -- 4.1.1 Geological Setting and General Features of the Luanshibao Rock Avalanche -- 4.1.2 Sedimentary Features of the Avalanche Deposit -- 4.2 Nyixoi Chongco Rock Avalanche -- 4.2.1 Geological Setting and General Features of the Nyixoi Chongco Rock Avalanche -- 4.2.2 Sedimentary Features of the Avalanche Deposit -- 4.3 Tagarma Rock Avalanche -- 4.3.1 Geological Setting and General Features of the Tagarma Rock Avalanche -- 4.3.2 Sedimentary Features of the Avalanche Deposit -- 4.4 Iymek Rock Avalanche -- 4.4.1 Geological Setting and General Features of the Iymek Rock Avalanche -- 4.4.2 Sedimentary Features of the Avalanche Deposit -- 5 Discussion -- 6 Conclusion -- References -- Part II: Original Articles -- Landslide Susceptibility Zonation Using GIS-Based Frequency Ratio Approach in the Kulon Progo Mountains Area, Indonesia -- 1 Introduction -- 2 Research Area -- 3 Methodology -- 4 Dataset and Analysis -- 5 Result & Discussion -- 6 Conclusion -- References -- Physically-Based Regional Landslide Forecasting Modelling: Model Set-up and Validation -- 1 Introduction -- 2 HIRESSES Model and Study Area -- 2.1 HIRESSES Model -- 2.2 Study Area -- 3 Data Collection and Preparation -- 3.1 Static Data -- 3.2 Dynamic Data -- 4 HIRESSES Simulation and Analysis of the Results -- 4.1 Monte Carlo Simulations -- 4.2 Analysis of the Model Output and Validation -- 5 Conclusion -- References -- Consequence: Frequency Matrix as a Tool to Assess Landslides Risk -- 1 Introduction -- 2 The Main Principle of Matrix Use -- 3 The Conceptual Background -- 4 Example of Risk Matrix -- 5 Issues Linked to the Use of Matrix -- 5.1 Scale and Verbal Terms -- 5.1.1 The Classes of Consequences and Frequency or Probability. 5.2 Setting the Risk Limits for Risk Matrix and F-N Curves -- 5.3 Uncertainty -- 5.4 Risk Reduction -- 5.5 Representing the Cascading Effect -- 5.6 Adding Dimensions -- 5.7 Cumulative Versus Non-cumulative Scale -- 5.7.1 An Example Ambiguous Use of Matrix -- 6 Summaries of the Recommendations -- 7 Example of Integration of Assessment for all Classes -- 8 Method -- 8.1 The Belonging to a Class and its Uncertainty -- 8.2 Classes Definitions -- 8.3 The Expert Assessment for a Specific Event -- 8.4 The Matrix Construction -- 8.5 The Example of a Particular Unstable Mass of Pont Bourquin Landslide -- 8.5.1 Landslide Settings -- 8.5.2 The Classes and Scales -- 8.5.3 Setting the Prior Probabilities -- 8.5.4 Results -- 9 Discussion and Conclusion -- References -- Do not Let Your Guard Down: Landslide Exposure and Local Awareness in Mexico -- 1 Introduction -- 2 Landslide Exposure and Awareness -- 3 Studied Area -- 4 Methodology -- 4.1 Aerial Survey Using UAVs -- 4.2 Expansion of the Urban Area -- 4.3 Rainfall Series -- 5 Results -- 6 Concluding Remarks -- References -- Landslides in Higher Education Curricula and Beyond -- 1 Introduction -- 1.1 General Views on Higher Education -- 1.2 The Focus of this Article -- 2 Materials and Methods -- 3 Results and Discussion -- 3.1 Background Studies on Landslides and Study Programmes -- 3.2 Academic Programmes in Disaster Risk Management -- 3.3 University Study Programs in Disaster Risk

Reduction & Management -- 3.4 Selected Summer Schools on Landslides -- 3.5 Landslide-Related Capacity Building Examples -- 3.6 Case 1: The International School on Landslide Risk Assessment and Mitigation (LARAM) -- 3.7 Case 2: Kokomerem Summer School on Rockslides and Related Phenomena in the Kokomeren River Valley (Kyrgyzstan) -- 3.8 Case 3: The International Research Association on Large Landslides (iRALL) School.

3.9 Case 4: ICL Landslide School Network -- 3.10 Case 5: ICL Landslide Teaching Tools -- 3.11 Case 6: ICL/IPL World Report on Landslides -- 3.12 Case 7: UNDRR PreventionWeb Platform -- 3.13 Case 8: United States Geological Survey (USGS) Web Sources -- 3.14 Case 9: NASA Models and Datasets -- 3.15 Case 10: The Landslide Blog in AGU Blogosphere -- 3.16 Case 11: BeSafeNet Platform -- 3.17 Case 12: The International Society for Rock Mechanics and Rock Engineering (ISRM) Course -- 3.18 Case 13: The LARIMIT Portal -- 3.19 Case 14: Humanitarian Library -- 3.20 Case 15: The VISUS Methodology -- 3.21 Case 16: The Twinkl Platform -- 4 Conclusions -- References --

Community Scale Landslide Resilience: A Citizen-Science Approach -- 1 Introduction -- 2 Related Works -- 2.1 Review of the Existing Citizen Science Approach -- 3 Citizen Science Approach -- 3.1 Requirements, Solutions, and Dimension of Landslide Resilience -- 4 Operationalization of the Citizen-Science Approach -- 4.1 Framework: Involving Citizens in Building Community-Scale Landslide Resilience -- 4.2 Pre-Disaster Measures -- 4.3 During-Disaster Measures -- 4.4 Post-Disaster Measures -- 5 Tools for Operationalization -- 5.1 Community Engagement -- 5.2 Social Media Data Analysis -- 5.3 AmritaKripa Mobile App -- 5.4 Landslide Tracker Mobile App -- 6 Case Study: Implementation of Framework -- 7 Discussion -- 7.1 Practical Challenges & Implementation Gaps -- 8 Conclusion -- References --

Remedial Measures Impact on Slope Stability and Landslide Occurrence in Small-Scale Slope Physical Model in 1 g Conditions -- 1 Introduction -- 2 Material and Methods -- 2.1 Physical Model -- 2.2 Soil Material Properties -- 2.3 Monitoring Equipment -- 2.4 Rainfall Simulator -- 2.5 Remedial Structures -- 3 Construction of Slope Models -- 3.1 Construction of Slope Models without Remedial Measure.

3.2 Construction of Slope Model with Installation of Gravity Wall -- 3.3 Construction of Slope Model with Installation of Gabion Wall -- 3.4 Construction of Slope Model with Installation of Pile Wall -- 4 Testing and Results -- 4.1 Testing of Slope Models without Remedial Measures -- 4.2 Testing of Slope Model with Gravity Retaining Wall -- 4.3 Testing of Slope Model with Gabion Wall -- 4.4 Testing of Slope Model with Pile Wall -- 5 Discussion and Conclusions -- References --

Surficial Geology and Geomorphology of the North Slide, Thompson River Valley, British Columbia, Canada: Application of Fundam... -- 1 Introduction -- 1.1 Generalized Climate and Hydrology at North Slide -- 1.2 Historical Change Detection at North Slide -- 1.3 Baseline Geological Conditions at the North Slide -- 2 Methods and Observational Results -- 2.1 Terrain and Hydrogeological Mapping -- 2.1.1 Benchmarked Satellite Image Interpretation -- 2.1.2 Benchmarked UAV Orthomosaic Interpretation -- 2.2 Field Observations of Earth Material Textures, Porosity Variations, and Slope Failure in Terrain Units -- 2.2.1 Bedrock and Undifferentiated Weathered Lag (Unit 1 -- R, R-R) -- 2.2.2 Glaciolacustrine Sediments (Unit 2 -- GLb) -- 2.2.3 Glaciofluvial and Ice-Contact Sediments (Unit 3 -- GFb) -- 2.2.4 Ground Moraine (Unit 4 -- Tv, Tb, Tb-V, Td) -- 2.2.5 Glaciolacustrine and Glaciofluvial Sediments (Unit 5 -- GLt, GFt) -- 2.2.6 Alluvial Sediments (Unit 6 -- Ap, at, Af) -- 2.2.7 Colluvial Sediments (Unit 7 --

Cv, Cz, Cz-F) -- 2.2.8 Anthropogenic Deposits (Unit 8 -- Hb) -- 3
Discussion: Fundamental Geoscience Applied to Geospatial Monitoring
Results -- 3.1 Hydrogeological Controls on Ancient Landslide Activity
-- 3.2 Hydrogeological Controls on Historical Landslide Activity -- 3.3
Hydrogeological Controls on Recent Landslide Activity. -- 3.4
Projecting Future Landslide Activity and Consequences.

Sommario/riassunto

This book is part of an open-access series by the International Consortium on Landslides, focusing on recent advancements in landslide research and technology. It contributes to the Kyoto Landslide Commitment 2020 and the 2030 Agenda for Sustainable Development, aiming to reduce landslide disaster risks globally. The volume includes original research, review articles, case studies, and educational materials, serving as a resource for academics, researchers, and professionals in the field of geology and civil engineering. The book's editors and contributors are international experts in landslide science, providing a comprehensive platform for sharing knowledge and practical applications to benefit society.
