	Nota di bibliografia	Includes bibliographical references.

Sommario/riassunto	This book examines systematically both the theoretical and practical issues that have characterized the discipline over the past two centuries. Some of the historically most consequential mistakes in archaeology are dissected and explained, together with the effects of the related controversies.

Leave Fossil Fuels in the Soil, Halt Deforestation': Stop Threatening the Planet (M. Satish Kumar).

Sommario/riassunto

This book provides an in-depth insight into the ecological perspective on a number of ongoing issues pertaining to security, the economy, the state, global environmental governance, development, and the environment. The chapters critically compare and analyze the role of global eco-politics in understanding and sorting out issues linked with climate change. Furthermore, it presents a contemporary and accessible description of why we need to embrace eco-politics in order to address the various ecological challenges that we face in the current changing climate scenario.
