

1. Record Nr.	UNINA9910799913603321
Autore	Edwards Brian <1944->
Titolo	Sustainability and the design of transport interchanges // Brian Edwards
Pubbl/distr/stampa	New York, N.Y. : , : Routledge, , 2011
ISBN	1-136-88613-3 1-136-88614-1 1-283-04357-2 9786613043573 0-203-83965-X
Descrizione fisica	1 online resource (205 p.)
Disciplina	711.7
Soggetti	Terminals (Transportation) - Design and construction Sustainable development
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (pages 191-192) and index.
Nota di contenuto	pt. 1. Concepts, ideas and evolution -- pt. 2. Design strategies -- pt. 3. Examples from recent practice -- pt. 4. Conclusions.
Sommario/riassunto	"The interchange is a new form of transport building which integrates into a single whole various modes of public transport, putting the passenger first (rather than the infrastructure). This book presents design principles for transport interchanges and offers analysis of best practice in the UK and abroad. The author demonstrates how this complex new building type integrates with the city, on the one hand, and with different types of transport on the other. In this integration design in both plan and section are important, as is urban and landscape design. The idea of 'interchange' is increasingly relevant as town planners, engineers and architects address the question of sustainable development with its emphasis on energy efficiency, social cohesion, access for the elderly, and urban regeneration"--Provided by publisher.
