Sommario/riassunto

Dealing with the social experience of grief, loss and bereavement are challenging areas for everyone, including health and social care practitioners who are often well placed to offer help and support to the bereaved. This book draws together a comprehensive range of worldwide evidence for understanding and supporting the bereaved in a variety of health and social care contexts. It can be used by practitioners from a wide range of backgrounds in both health and social care to gain an appreciation of bereavement and its associated support and care. Additionally, it can be used for personal a
