	Sommario/riassunto	This book constitutes the thoroughly refereed post-proceedings of the 6th International Conference on Numerical Methods and Applications, NMA 2006, held in Borovets, Bulgaria, in August 2006. The 84 revised

full papers presented together with 3 invited papers were carefully reviewed and selected from 111 submissions. The papers are organized in topical sections on numerical methods for hyperbolic problems, robust preconditioning solution methods, Monte Carlo and quasi-Monte Carlo for diverse applications, metaheuristics for optimization problems, uncertain/control systems and reliable numerics, interpolation and quadrature processes, large-scale computations in environmental modelling, and contributed talks.

| Sommario/riassunto | Places of Pain and Shame is a cross-cultural study of sites that represent painful and/or shameful episodes in a national or local community's history, and the ways that government agencies, heritage professionals and the communities themselves seek to remember, commemorate and conserve these cases - or, conversely, choose to forget them. Such episodes and locations include: massacre and genocide sites, places related to prisoners of war, civil and political prisons, and places of 'benevolent' internment such as leper colonies and lunatic asylums. |
