Sommario/riassunto	For decades, social scientists have searched for factors that shape pro-environmentalbehaviour. However, only a few studies have investigated the causes andconsequences of participation in environmental organizations. This book fills the gap by analysing in detail the determinants of environmental participation and its consequences in different parts of the world. Benno Torgler, Maria A. Garcia-Valinas and

Alison Macintyre seek the answer to several questions regarding who is working towards positive outcomes for our environment, what sort of social and institutional c
