Note generali Includes bibliographical references and index. Nota di bibliografia Nota di contenuto Introduction: evidence in practice -- From formal knowledge to guided complexity -- Clinical thinking and knowledge in practice -- Growing mindlines: laying the foundations -- Growing mindlines: cultivating contextual adroitness -- The place of storytelling in knowledge sharing -- A community of clinical practice? -- Co-constructing collective mindlines -- Co-constructing clinical reality -- Conclusions and implications. Sommario/riassunto This book challenges the evidence-based practice movement to rethink its assumptions. Firmly rooted in real practice while drawing lucidly on a great breadth of theoretical frameworks, it examines afresh how clinicians use knowledge. Evidence-based practice has recently become a key part of the training of all health professionals. Yet despite its 'gold-standard' status, it is faltering because too much effort has gone into insisting on an idealised model of how clinicians ought to use the best evidence, while not enough has been done to

understand why they so often don't. <E
