1. Record Nr. UNINA9910800114203321

Autore	Ikhmayies Shadia Jamil
Titolo	Advances in Minerals Research / / edited by Shadia Jamil Ikhmayies
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2024
ISBN	9783031491757 3031491750
Edizione	[1st ed. 2024.]
Descrizione fisica	1 online resource (321 pages)
Collana	Advances in Material Research and Technology, , 2662-477X
Disciplina	620.11
Soggetti	Materials science Mineralogy Chemical engineering Materials Science Chemical Engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1 Introduction to Mineral Research -- 2. Use of Ultrasound in Physical and Chemical Mineral Processing Operations -- 3. Advanced techniques on fine and coarse particle flotation -- 4. Differentiation between natural quartz based on thermoluminescence properties -- 5. Silicones and their Applications.
Sommario/riassunto	This book offers background material, reviews, and researched findings into the realms of minerals, mining, metallurgy, and engineering. Firstly, it elucidates fundamental mineral concepts, mining techniques, and mineral processing methods; secondly, it unveils cutting-edge insights on fine and coarse particle flotation, unveiling breakthrough technologies for enhanced efficiency; and thirdly, it explores the innovative applications of ultrasound and thermoluminescence in mineral processing, offering a holistic view of the latest advancements. This book sheds light on the versatile uses of silicones, the intricacies of bentonite clay, and the production pathways, properties, and applications of hydroxyapatite. Furthermore, the book provides invaluable insights into biomimetic biomineralization, the synthesis of low-carbon bio-cements, and the pioneering strides in mineral-based phase change materials. .
