

1. Record Nr.	UNINA9910800167903321
Autore	Patton David R.
Titolo	Forest wildlife ecology and habitat management / / David R. Patton
Pubbl/distr/stampa	Boca Raton, FL : , : CRC Press, an imprint of Taylor and Francis, , 2010
ISBN	0-429-06542-6 1-4398-9506-6
Edizione	[First edition.]
Descrizione fisica	1 online resource (278 pages) : illustrations, maps
Disciplina	639.909152
Soggetti	Animal ecology Forest animals Forest ecology Wildlife habitat improvement
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Includes CD-ROM".
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Nota di contenuto	Front Cover; Contents; Preface; Acknowledgments; About the Author; 1 Working Concepts; 2 Survive and Reproduce; 3 Integrating Forestry and Wildlife Management; 4 Management Strategies; 5 Forest Attributes and Wildlife Needs (FAAWN); Appendix: Conversion Factors; Back Cover
Sommario/riassunto	Across the continental United States, one can identify 20 distinct forest cover types. Most of these are to be found on federal lands managed by the U.S. Forest Service and Bureau of Land Management. Those responsible for the management of trees that form the 20 different cover types and the diversity of forest wildlife that reside in them must have a solid grounding in concepts of forest management, especially silviculture, as well as concepts of wildlife management, in order to integrate both as part of any effective natural resource management plan.
