

1. Record Nr.	UNINA9910805674303321
Autore	Watzl Sebastian
Titolo	Experimentelle und numerische Analyse des Körperschallübertragungsverhaltens von Aggregatlagerelementen im akustisch relevanten Frequenzbereich // Sebastian Watzl
Pubbl/distr/stampa	Karlsruhe : , : KIT Scientific Publishing, , 2022
Descrizione fisica	1 online resource (212 pages)
Collana	Karlsruher Schriftenreihe Fahrzeugsystemtechnik
Disciplina	621
Soggetti	Sound - Transmission - Testing Numerical analysis - Applications Structural dynamics - Mathematical models
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	The structure-borne sound transmission properties of hydraulic and conventional engine mounts is analyzed experimentally and numerically in a acoustically relevant frequency range. In order to do so, first of all a test bench environment for analyzing the dynamic sound transmission properties is presented. In subsequent steps the main influence parameters on the transmission properties are determined experimentally and numerically.
