Sommario/riassunto	This book addresses the incongruence between a quite developed EU policy strategy and a well-embedded legal objective on the one hand, and the lack of direct legal action on the other. Analysing the role of social policy instruments, fundamental rights, and the constitutional framework of the European Union, it makes a detailed case for a contribution of EU law to the policy objective of combating poverty and social exclusion. Drawing on work in law, politics, social policy and economics, this book will interest scholars and policy-makers in the areas of EU law, labour and social security, human rights, political science and social and public policy.
