Sommario/riassunto	This book contains thoroughly refereed and revised papers from the 8th International Andrei Ershov Memorial Conference on Perspectives of System Informatics, PSI 2011, held in Akademgorodok, Novosibirsk, Russia, in June/July 2011. The 18 revised full papers and 10 revised short papers presented were carefully reviewed and selected from 60 submissions. The volume also contains 5 invited papers covering a

range of hot topics in computer science and informatics. The papers are organized in topical sections on foundations of program and system development and analysis, partial evaluation, mixed computation, abstract interpretation, compiler construction, computer models and algorithms for bioinformatics, programming methodology and software engineering, information technologies, knowledge-based systems, and knowledge engineering.

Sommario/riassunto

Key Papers on Korea is a commemorative collection of papers celebrating 25 years of the Centre of Korean Studies (CKS), SOAS, University of London that have been written by senior academics and emerging scholars. The subjects covered in this collection reflect the different research interests and different strengths of the CKS and include historical perceptions of ancient kingdoms in Manchuria, North Korean propaganda literature, the problematic history of Sino-North Korean borderlands, the millenarian aspects of Won Buddhism, and the importance of the years 1910-11 in the development of Korean music. The collection is framed by two pieces on SOAS, which have been commissioned exclusively for this publication: an introduction that examines the 60-year history of Korean studies at SOAS, and a closing paper that sheds light on the rare collections of Korean art held at SOAS.
