Nota di contenuto	part I. Ancient science, natural teleology, and the order of politics -- part II. Heavenly perfection and psychic harmony -- part III. Skepticism, mechanism, and the new politics -- part IV. The scientific roots of liberalism and contemporary "biopolitics".
Sommario/riassunto	Matter and Form explores the relationship between natural science and political philosophy from the classical to contemporary eras, taking an interdisciplinary approach to the philosophic understanding of the structure and process of the natural world and its impact on the history of political philosophy. It illuminates the importance of philosophic reflection on material nature to moral and political theorizing, mediating between the sciences and humanities and making a contribution to ending the isolation between them.
