Sommario/riassunto	Rather than an attempt at an exhaustive bibliography of morphology, this is a collection of major and selected minor works of theoretical interest in the broadest sense. The area of morphology represented here exhaustively is contemporary (generative) theoretical morphology, interpreted broadly enough to include theoretically interesting structuralist works, works aimed at explaining deep motivations of morphology or pertinent to contemporary theoretical morphology. Selected descriptive works have been included as well; it is not at all simple to draw a line between descriptive works of theoretical interest and fundamentally theoretical works, and in addition we hope to provide entry points into a variety languages for morphologists seeking language-specific evidence for general hypotheses.
